

14.8 cm Square Easel Card Template

I have given instructions beginning with an A4 card base:

1. Print this template onto the heaviest card stock your printer allows
2. Cut out this central template, & either use as is, against an A4 card or:-
3. With an A4 card in portrait position, measure & mark both top & bottom at 6.2 cm from the edge, draw in this line & cut.
4. Lay this template face up on top of the card & mark the two lines, shown here by perforated lines.
5. Score in these lines & fold both exactly the same way, creating an easel card as shown in the diagram below.
