

Cut out all template pieces. Lay the main body of the pram template onto your folded card with the straight edge (on the left) against the fold. Draw around & cut out. Cut out 4 of the largest circles in card matching your base card. Cut two of the medium circles in patterned card or paper & the final two circles either in a coordinating paper or use buttons instead.

Cover the base of the pram in one pretty paper & the hood in another. Attach the inner circles to the two of the larger ones & with the help of the grid on your cutting mat adhere them to the pram body. Open up the card & turn it face down, lay the second set of large circles over the first, add glue & close the card to secure in position.

Draw faux stitching around the wheels, base & hood of the pram.
