

Inverted Screen Box Template

You may find this template easier to manage by simply printing it out onto the back of a sheet of A4 decorative card.

Instructions:

1. Cut through the black lines on the template & fold the on red score lines
2. Place this template on decorative A4 card, tape the bottom half down to mark out line positions carefully.
3. Cut through black lines, score & fold red perforated lines
4. Fold aperture flaps as indicated
5. Flip the template over, top to bottom
6. Flip your card over side to side
7. Draw in the aperture position lightly – this will be the position for your image
8. Decorate your card while flat.
9. Flip card & position main image
10. Fold in the 'fold under' tabs & attach 3D pads – (one is meant to be narrower than the other three).
11. Dab some tacky glue on the pattern side of the six holding tabs (highlighted X)
12. Stick the X tabs to the blue dot positions – inside of the box
13. Attach DST in positions indicated by the pale orange boxes
14. Fold the box up & carefully position the tabs under the aperture & then peel away the DST backing & seal the box completely.
