

King Tut Pyrimage Card with Box Project

What you will need to complete this project:

- 3 x A4 white card blank
- 1 x A4 King Tut Pyrimage print - available on website
- 1 x A4 Hieroglyphics printed sheet
- 1 x Icon images - enclosed
- 1 x 13.5 x 10 cm gold foil card
- 1 x 12 x 4 cm gold foiled card
- Pencil, ruler & scissors
- Glue stick/DST (double sided tape)
- Silicone glue or approx 35 3D pads
- Scoring tool

How to assemble this project:

The Card:

Fold the A4 card blank in half to form an A5 card measuring approx. 21 x 14.8 cm. Smear the entire front surface with glue stick and adhere half of the A4 sheet of hieroglyphics paper, smooth out any bubbles. Add DST to the back of the gold foiled card.

Carefully cut out each layer of the Pyrimage. Mount the first onto the gold foil card using the glue stick, and smooth out carefully. Add silicone glue or 3D pads to each of the other layers, spreading them out evenly. Use more on the base levels to build a firm foundation for the structure.

Peel off the backing paper from the DST on the reverse of the Pyrimage, and adhere it to the centre of the card front.

The Box:

Using a pencil and ruler, and with an A4 card blank in horizontal position, mark a 2.6 cm strip down one short edge then trim this off. Now make faint pencil marks all around the edge of the card creating a border of 2.75 cm. Score the lines with your scoring tool. From the corners where the lines cross, to the outer edge of the card draw a diagonal line and cut these lines. Repeat with the second A4 card blank, making

the border around the card 2.5 cm rather than 2.75 cm. Fold and firmly crease each scored line, as well as the triangular flaps at the corners. Measure and cut a further piece of hieroglyphics paper 21 x 14.8 cm and stick firmly to the larger box, this is the lid.

Assembling the box:

Using DST on the triangular flaps, stick one of each pair inside the box, and the other inside, try to do them all the same way. This method makes the corners nice and sturdy.

The Box top Icon:

Cut out each of the three images from the sheet and adhere the first firmly to the smaller gold foil card, trim edges to leave a small border showing. Using 3d pads layer the second image directly over the first, repeat with the final image. Attach to front of box in the lower right hand corner using 3D pads.
