

A6 Pop Up card Insert Template

Use this template to cut out a lightweight card insert.
Cut along the solid black lines both top & bottom of the shaded areas.
Score the blue perforated lines down the side of each shaded area, as well as down the centre of the

insert.
Cover the three shaded areas with your choice of paper, tucking the excess to the back of the cut out.
Fold the insert in half in the normal fashion & then back

on itself so that the central fold has been creased both ways.
Crease the scored lines down the sides of the decorated portions.

Invert these areas so that they pop up inside of the insert – thus pop up when the card is opened.
Completely cover the back of the insert – with the exception of the decorated panels – with wet glue & securely fix within the card.

Finish off with ribbons & bows to give the appearance of wrapped gifts.
