*All left over from Oriental Sunset Project

How to assemble this project:

With the card blank in landscape position, measure and mark the central point both top and bottom at approx 10.5 cm, score in this line & fold the card, and defining crease using the tip of the ruler.

Using the permanent tape mouse, fix the printed vellum to completely cover the front of the card, then add the strip of red vellum, positioning it down the centre of the card topped by the strip of gold vellum also positioned centrally.

Change to DST, and affix the two strips of decorative paper to the edges of the card as seen in main picture above.

Use a compass/compass cutter or the template enclosed and trim the decorative paper circle down to a 5.5 cm diameter. Trim with border peel offs and then add 3D pads to the reverse. Trim the red circle with border peel offs, again add 3D pads to the reverse.

Using the foil tape, run a border down both edges of the card, use the tip of your ruler to bond firmly. Trim down the sides of each of the paper layers with the border peel offs, but not the top or bottom.

Add your chosen peel off greeting to the scrap of gold foil card and mount onto 3D pads.
Using the main picture as a guide, position the red circle centrally approx. 2 cm from the top of the card, and top with the decorative circle, finally add the foiled card greeting centrally approx. 2 cm from the base of the card.
