

T. Light Gift Card Box Template

Instructions:

Firstly, with this being a full A4 template many printers will leave a white border around the edges. If yours prints with this white border you need to draw in the vertical lines so they reach the top & bottom of the page before scoring all of the perforated lines, & then cutting out the template.

Carefully fold all of the scored lines – they all go in the same direction. You will need a strong, fairly instant setting glue if your box is to hold the weight of the tea lights, so either a hot glue or a super adhesive tape. (These usually come on a red backing paper, so easy to identify).

The easiest way to construct the box is, with the work

flat on your work surface, fold on the line above so this panel is face down on the panel above. Lift it slightly & fold in the 'wings'. Apply your chosen adhesive to these wings & fold up the other shaped wing to meet it & form a bond.

Slip in your T. Light gift card & then apply adhesive to the wings indicated by the grey box, & secure.
